

Homes Built to Save You Money

A home is more than just a roof over your head, it is a place of comfort and happiness. As an ENERGY STAR® Certified Home Builder, Pulte Homes are energy efficient with state-of-the-art insulation, heating and cooling to keep your home cozy. They are at least 10 percent more energy efficient than homes built to code and achieve a 20 percent average improvement in energy efficiency compared to typical new homes. Whole home insulation, Low E windows and energy efficient appliances help keep your home warm and your bills low - saving an *average of \$646 on electricity annually. You can enjoy greater comfort and help save on energy costs in your new home.

ENERGY STAR® is a joint program of the Environmental Protection Agency (EPA) and the Department of Energy. Its main goal is to help consumers and businesses through the promotion of energy efficient products and practices. ENERGY STAR® Homes are designed with features, construction techniques and materials to help reduce energy costs and energy usage. All information and energy ratings provided by ENERGY STAR® are based upon information obtained from third parties. Actual energy costs and/or usage are dependent on a number of factors, including utility rate, energy consumption, energy conservation practices, home orientation, and weather conditions. No guaranty is made on actual energy cost savings. Photographs and renderings are for illustrative purposes only and are not intended to be an actual representation of a specific home being offered. STAR® ENERGY STAR® name is a registered trademark owned by the U.S. EPA. Pulte Homes® is a registered trademark of PulteGroup, Inc. and/or its affiliates.
